

## Rice Draw Down Water Level Meter

The Rice Draw Down Water Level Meter is a powerful tool for low flow sampling, purging and well development. Allow the meter to track the draw down for you. When the probe is no longer immersed in water an alarm sounds and the light on the meter goes on. Use the draw down meter to determine flow rates for low flow sampling and to protect your pump from running dry in all pumping applications.

### Features

- Easy to read, flexible, stainless steel tape, manufactured to ASME standards along with heavy duty Kynar jacket is easy to clean
- Easy to clean probe is fully depth rated
- Built in tape guide and well hanger
- Vinyl coated ergonomic handle for comfortable transport and winding
- Padded carry case
- No tools required to change battery
- Light weight
